— FEEL SAFE, FEEL FREE —

— INTRODUCING SAFEPAD™ —

Health and Hygiene

Safepad™ is a reusable sanitary pad designed to provide a safe and infection free experience while in use.

75% of all women experience vaginal yeast or bacterial infections during their lifetime. These infections cause health issues and in worst cases will impact fertility.

Safepad™ hygienic sanitary pads are designed with a permanently bonded antimicrobial technology that helps reducing vaginal infections caused by *Candida albicans* along with infections from other pathogens.

The antimicrobial technology is based on a treatment that leaves a positively charged layer on the fabric. This layer will attract and kill the negatively charged microbes, like bacteria and fungi. The treatment does not contain any harmful chemicals.

The permanently bonded antimicrobial fabric along with a highly absorbent material provides a comfortable and hygienic experience for the women.

Antimicrobial Efficiency*

<i>Pseudomonas Aeruginosa</i>	Bacteria	99,99% reduction
<i>Escherichia Coli</i>	Bacteria	99,99% reduction
<i>Staphylococcus Aureus</i>	Bacteria	99,99% reduction
<i>Klebsiella Pneumoniae</i>	Bacteria	99,99% reduction
<i>Aspergillus Niger</i>	Fungus	99,99% reduction
<i>Candida Albicans</i>	Fungus	99,31% reduction

* as tested under experimental conditions JIS L 1902:2008

Comfortable

Safepad™ is made of a soft, durable and breathable fabric, that offers reusability, protection and comfort.

Environmentally friendly

Safepad™ is re-usable and can be re-cycled.

Easy to Use:

Safepad™ has high and quick absorbency technology and will not leak during use.

Safepad™ fabric technology ensures high and immediate absorbency, non-leakage and quick drying after wash.

We are committed to serving women in need of hygienic protection.

The anti-microbial function simply means that the pad disinfects itself.

— THE ADVANTAGES OF SAFEPAD™ —

- Antimicrobial ✓
- High absorbency ✓
- No irritation ✓
- Reusable ✓
- Comfortable ✓

Specifications – Safepad™

Property	Specifications	Test Standard
Size	Day pad size (L 27cm, W 20cm) Night pad size (L 34cm, W 20cm)	Metric ruler
Fabric	Polyester based: a) Top layer: Polyester knitted terry fabric b) Absorbent layer: Polyester knitted terry fabric c) Bottom layer: Polyester knitted fabric with PU Lamination	
Weight	Day pad: 22,5 g (+/-5%) Night pad: 27,5 g (+/-5%)	Metric scale
Color Fastness – Cross staining/ Crocking	4-5	AATCC -8
Pad Shrinkage	Maximum +/- 4%	ISO 6330
Liquid absorption	Day pad: 20 ml Night pad: 30 ml	ASTM D 7367-14 Modified method
Drying time	<60min	Internal lab method
pH	6,5 – 7,5	(ISO 3071:2005)
Anti-Microbial Efficacy		
Antimicrobial Efficacy against Gram positive bacteria	>99.99%*	JIS L1902
Antimicrobial Efficacy against Gram Negative bacteria	>99.99%*	JIS L1902
Antimicrobial Efficacy against Yeast	>99.99%*	JIS L1902
Antimicrobial Efficacy against Fungus	>99.31%*	JIS L1902

Packaging:

- 3 day pads + 1 night pad + 1 storage bag
- Customized options available

* as tested under experimental conditions JIS L 1902:2008

Safepad™ - User instructions

Place Safepad™ inside your underwear

Bend the wings of Safepad™ downward

Snap the button in the wings

After use fold the Safepad™ and put it into the storage bag until washing

Safepad™ - Washing instructions

Soak the used Safepad™ in cold water for 30min with detergent or soap. Do not use bleach.

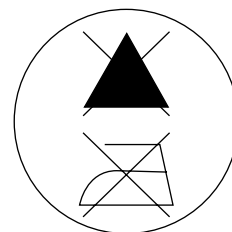

Rinse with clean water

Dry in a well ventilated area

Reuse Safepad™ after it has been dried well.

Safepad™ should not be bleached or ironed

Safepad™ - Packaging Content

Standard:

- 3 x Super daypads
- 1 x Long nightpad
- 1 x Storage bag

Why Menstrual Hygiene Management matters to achieve the SDGs

The Sustainable Development Goals (SDGs) are a commitment to finish what was started - to end poverty in all forms and dimensions by 2030.

This involves targeting those living in vulnerable situations, increasing access to basic resources and services, and supporting communities affected by conflict and climate-related disasters. At Real Relief, we work across the SDGs to contribute to achieve the 17 goals. Among other products we focus on Safepad™, an antimicrobial reusable sanitary pad. As Menstrual Hygiene Management #MHM matters to achieve the SDGs.

Goal 3: Ensure healthy lives and promote well-being for all ages.

Fact: If girls and women lack access to menstrual hygiene products, they are often forced to use other unhygienic materials, that might lead to an increased incidence of reproductive track infections (RTIs)

Solution: Include menstrual health as a critical component of reproductive health #safepad

Goal 4: Ensure inclusive and equitable quality education and promote life-long learning opportunities for all.

Fact: Girls in developing countries miss up to 5 days of education monthly while they menstruate.

Solution: Include menstrual health and education on the school agenda #safepad

Goal 5: Achieve gender equality and empower girls and women.

Fact: Taboos and myths related to menstruation often portray girls and women as inferior to boys and men.

Solution: Ensure that girls and women can manage their menstruation with dignity. Breaking down taboos and helping to build positive norms #safepad

Goal 6: Ensure availability and sustainability of water and sanitation by all.

Fact: 2.4 billion people lack access to improved sanitation facilities. Girls and women are particularly affected by this lack of access to privacy and hygiene.

Solution: Girls and women need adequate water and sanitation facilities including safe and culturally accepted disposal systems and/or reusable hygiene products #safepad

Goal 8: Promote sustained inclusive and sustainable economic growth, full productive employment and decent work for all.

Fact: Female workers do not attend work as the workplaces lack adequate toilet facilities.

Solution: Ensuring that employers provide adequate sanitation facilities at workplaces #safepad
